TBR / PCR / UHP / 4x4 / WINTER / VAN

Performance - Precision - Power

Torque Tyres enjoys a high popularity in many international markets. It is the major brand owned by the TIA Group based in England in association with a first class manufacturing facility based in China.

TIA Group work closely with the factory to develop the brand, size range, technical and marketing strategies. The TIA Group have sold tyres into over 50 countries around the world with new distributors signing up on a regular basis.

The factory in China is one of the leading tyre manufacturers in the country. It was established in 1995 and covers an area of about 1.6 square kilometers, with the total assets of over RMB 5 billion and more than 6000 employees.

The company owns four plants in China. These include a TBR factory with annual production capacity of 4 million tyres, a PCR factory with annual production capacity of 12 million tyres, a tyre manufacturing equipment factory and a power plant.

The factory manufactures the Torque tyres on behalf of the TIA Group and specializes in manufacturing radial tires widely used in passenger car, SUV, truck and bus and in all seasons with excellent performance, which are well-reputed all over the world.

The factory takes pride in its smart R&D team and advanced testing facilities, which assure the excellent and stable quality of its products. Much of the manufacturing equipment is imported from Europe, United States and Japan.

The factory has built a strong quality assurance system and its products are accredited with certificates of ISO9001, TS16949, DOT, ECE, GCC, INMETRO, CCC, BIS, SNI, and SONCAP

TQ011 / TQ702

The truck tyre range has been specifically designed to deliver excellent grip and performance on all road surfaces. The special tread compounds provide a more comfortable driving experience and minimises irregular wear.

Some of the features and benefits:

- ▶ Outstanding resistance to punctures and tearing.
- ▶ Excellent heat dissipation.
- ▶ Stone ejection design.
- ▶ Excellent water evacuation.
- ▶ Lower rolling resistance.

Can be positioned on any axle

TORQUE 
TYRES

Truck Tyres

STEER TQ121

All purpose highway and urban use.

Features

- Four circumferential grooves.
- Solid shoulder design.
- Specially designed compound.

Benefits

- ▶ Provides excellent anti-side slipping performance and ensures excellent water evacuation.
- ▶ Provides outstanding resistance to abrasion.
- ▶ Reduces rolling noise greatly and delivers lower rolling resistance.

Truck Tyres

STEER TQ660

For highway and steer use.

Features

- Four wide circumferential grooves.
- Siped rib and shoulder design.
- Reinforced carcass and wide tread.
- Specially designed compound.

Benefits

- ▶ Ensures excellent water evacuation, even pressure distribution and heat dissipation.
- ▶ Provides excellent heat dissipation.
- ▶ Ensures excellent handling and safe performance.
- ▶ Delivers lower rolling resistance.

ALL SEASON

TQ025 / TQ7000AS

The car tyre range has been specifically designed to deliver excellent grip and performance on both wet and dry roads.

Amongst the features and benefits:

- ▶ Special tread compounds with four wide circumferential tread grooves
- ▶ Optimized variable pitch tread design
- ▶ Superior comfort and quiet ride
- ▶ Better ride stability and handling performance
- ▶ Improved groove and bead profile design
- ▶ Silica tread compound

Stability and Response

Jointless bead wire and high density nylon improve high speed stability and maximise steering response

Driving Control

Multi-inner radius improves driving control while assuring performance at high speed.

Water Evacuation

Four Wide circumferential grooves deliver efficient water evacuation and prevent aquaplaning

Passenger Car Radial

Ultra High Performance

The UHP - TQ901 delivers excellent grip whatever the road conditions for your high performance vehicle.

UHP
TQ901

Features

- Four wide circumferential grooves, lateral grooves with fine sipes and continuous block patterns on shoulder.
- Variable pitch tread design.
- Jointless nylon band.
- Rim protector.

Benefits

- Provides efficient water evacuation, outstanding wet performance and enhanced stability at high speed cornering.
- Superior comfort and quiet ride.
- Improved tread stiffness and uniformity and delivers high speed stability.
- Provides better performance on a wet surface and reduces rolling resistance. Protects wheels from curb damage.

All Season

The car tyre range has been specifically designed to deliver excellent grip and performance on both wet and dry roads.

TQ025

Features

- Special tread compound.
- Continuous solid centre ribs.
- Improved groove and bead profile design.
- Optimized variable pitch tread design.

Benefits

- ▶ Excellent grip on wet and dry roads.
- ▶ Improves directional stability, provides a more comfortable experience and prevents irregular wear.
- ▶ Better ride stability and handling performance.
- ▶ Superior comfort and a quiet ride.

All Season

Our van tyre range has been specifically designed to deliver excellent grip and performance on both wet and dry roads.

TQ7000AS

Features

- Reinforced structure composed of two steel belts and full nylon protector.
- Zig-zag vertical groove and open horizontal groove arrangement with sipes.
- Special abrasion resistant tread compound.
- Variable pitch pattern.

Benefits

- ▶ Delivers extra puncture resistance and robust load bearing capacity.
- ▶ Provides excellent wet and dry grip.
- ▶ Provides enhanced mileage with reduced heat.
- ▶ Superior comfort and quiet ride.

The TQ-AT701 - the ultimate design in toughness, grip and reliability for your four wheel drive, off-road vehicles.

4x4
TQ-AT701

Features

- Block tread design with multiple sipes.
- Open shoulder grooves.
- Jointless nylon band.
- Strong structure design.

Benefits

- Provides outstanding off-road traction.
- Prevents aquaplaning with enhanced wet grip performance.
- Provides reliability and durability.
- Improved tread stiffness and uniformity and delivers high speed stability.

Winter Tyres For Cars

The PCR - TQ022 has a proven track record for safety and reliability for your family car in conditions of the severest snow and ice.

Winter PCR TQ022

Benefits

- ▶ Enhance braking, cornering grip and the removal of water and slush.
- ▶ Delivers superb traction and lower rolling resistance.
- ▶ Improves water evacuation and stability in deep snow conditions.
- ▶ Provides excellent grip, minimises the friction and reduces rolling resistance.

Features

- Outer longitudinal rib block design and inner lateral slots.
- Silica tread compound.
- Three longitudinal grooves.
- Non-through block sipes.

Winter Tyres For Cars

The PCR - TQ023 and W601 - safe and reliable for your family car in conditions of the severest snow and ice.

Winter PCR TQ023 Studdable

Benefits

- ▶ Enhanced road contact and performance for snow and wet road conditions.
- ▶ Enhanced acceleration and braking under winter conditions.
- ▶ Improved handling when changing lanes and cornering.
- ▶ Improves traction performance on snow and ice and minimised stud noise.
- ▶ Silica-rich compound gives improved ice, snow and wet grip while maintaining performance in cold temperatures.

Features

- Directional winter tread pattern.
- Optimised tread sipe.
- Solid centre rib.
- Optimum allocation multi-random stud lines.
- Winter traction compound.

Winter Tyres For Cars

Winter PCR TQ020

Benefits

- ▶ Provides better performance on wet surfaces and reduces rolling noise.
- ▶ Enhanced traction and handling in snow conditions.
- ▶ Improved grip performance from wet and frigid surfaces to snow and ice.
- ▶ Delivers robust load bearing capacity and rugged durability.

Features

- Silica tread compound.
- Large block tread design.
- Zig-zag grooves and high density sipes arrangement.
- Reinforced construction.

TORQUE 
TIRES

Light Commercial Range

VAN

TQ05 / TQ02

WINTER VAN

WTQ5000 / WTQ6000

The van tyre range has been specifically designed to deliver excellent grip and performance on both wet and dry roads.

With its reinforced structure composed of two steel belts and a full nylon protector, you can be confident of its ability to cope with the rigours of van driving.

Some of the benefits include:

- ▶ Extra puncture resistance
- ▶ Excellent wet and dry grip
- ▶ Superior comfort and quiet ride
- ▶ Better ride stability and handling performance

TORQUE 
TYRES

Light Commercial

The TQ05 and TQ02 tyres deliver excellent grip whatever the road conditions for your light commercial vehicle.

Van
TQ05

Features

- Reinforced structure composed of two steel belts and full nylon protector.
- Zig-zag vertical groove and open horizontal groove arrangement with sipes.
- Special abrasion resistant tread compound.
- Variable pitch pattern.

Benefits

- ▶ Delivers extra puncture resistance and robust load bearing capacity.
- ▶ Provides excellent wet and dry grip.
- ▶ Provides enhanced mileage with reduced heat.
- ▶ Superior comfort and quiet ride.

An abstract, high-contrast black and white graphic featuring a complex, dense network of white lines on a black background. The lines form a series of overlapping, undulating, and somewhat chaotic patterns that resemble a wireframe mesh or a stylized, abstract landscape. The lines are thin and vary in density, creating a sense of depth and movement. The overall effect is one of intricate, organic complexity.

TBR Technical Information

Tyre Labelling Regulations

What does the label mean in practical terms?

FUEL EFFICIENCY

Tyre energy efficiency (fuel consumption and CO₂ emissions) is related to its rolling resistance.

Low rolling resistance plays a crucial part in how much a tyre contributes to fuel savings in the transport sector.

How Fuel Consumption & CO₂ Emissions Are Measured

To comply with the European regulation, measurements will be carried out on tyres using calibrated rolling machines.

The ratings awarded will correspond to the measured values given in kilograms per tonne (kg/t).

Ratings will range from "A" (up to 4 kg/t) to "F" (over 8 kg/t), i.e. twice the initial coefficient. The "G" rating will not be used.

BRAKING ON WET SURFACES (Truck Tyres)

Tyre performance when braking on wet surfaces is one of the main safety benefits provided by tyres.

Braking efficiency on wet surfaces is tested by measuring the deceleration performances – between 60 and 20km/h when making an emergency stop.

How Braking On Wet Surfaces Is Measured

The data is collected on test tracks sprayed beforehand to create a layer of water from 0.5 to 2 millimetres in depth. The ambient temperature, and that of the ground, are permitted to vary between 5 and 35°C. Track characteristics (type of coating, roughness, coefficient of friction on the asphalt, etc.) can also vary within the limits prescribed by the Legislator. The test vehicles are specifically designed for the purpose.

Ratings will range from "A" to "F". There will be no "G" rating.

EXTERNAL ROLLING NOISE

External noise is taken into account since it represents noise pollution. This influences the environmental impact of transport, especially for the transport sector operating in urban areas.

How External Noise Is Measured

The European regulation takes into account the number of decibels produced as a tyre rolls and compares it with the future target which will come into force between 2012 and 2016 (regulation EC/661/2009).

Three black lines indicate the poorest performance. The noise emitted by the tyre is over the value set out in the future standard but below the maximum currently authorised.

Two black lines mean that the noise emitted by the tyre is in line with the limits which will be applied in the future.

One black line means that the level of tyre noise is already 3 decibels below the future legal limit.
